Abstract (en)
[origin: WO2008151014A2] An imaging system for imaging a target comprising: an image reader having a field of view for imaging a target, the image reader having a housing with an inclined indentation; a stand adapted for holding the image reader a distance from the target, the stand having an inclined hook; a positioning apparatus for positioning the target within the field of view; wherein the inclined hook mates with the inclined indentation to hold the image reader and the image reader is removable from the stand in order that the image reader may image targets not placed in the positioning apparatus.
