Abstract (en)

A relaxation apparatus includes a body-supporting unit for supporting a user's body, a rocking unit for rocking the body-supporting unit and a controller for controlling the rocking unit to rock the body-supporting unit. The body-supporting unit includes an airbag which is inflated to press the user's body or contracted in accordance with supply or exhaust of air by an air pump. The controller controls the air pump to increase or decrease its output in accordance with an increase or decrease in at least one of frequency and amplitude of the rocking motion.
