Abstract (en)

[origin: EP2151513A2] The downward open upper rolling-carrying and loading arm has a stretching unit, which is supported at an end over the supports on a holding bar. A locking element is arranged at the front side of the upper rolling-carrying and loading arm. A closure element (1), which is made of plastic, is detachably connected by form-fit connection with the upper rolling-carrying and loading arm. The closure element is formed for demountable receptacle of auxiliary units.
