Abstract (en)

The device has a light source (14) for illuminating a set of storage compartments (5-7), where a timer controls an operating condition of the light source. A set of partially transparent doors (1-3) defines the storage compartments, where one of the storage compartments is switched-on or switched-off independent of remaining storage compartments. The timer is programmed to control the operating condition of the light source after a periodically regular scenario. A set of bases (8, 9) is arranged such that bottles are stored horizontally between adjacent bases.

Abstract (de)

Ein Kältegerät mit einer wenigstens teilweise durchsichtigen, wenigstens ein Lagerfach (5, 6, 7) begrenzenden Front (1, 2, 3) und wenigstens einer ersten Lichtquelle (14) zum Beleuchten des Lagerfachs (5, 6, 7) ist mit einem den Betriebszustand der Lichtquelle (14) steuernden Zeitgeber ausgestattet.
