Abstract (en)

[origin: WO2008151748A1] The invention relates to a sliding surface element (10) for artificial skiing systems, particularly ski jump systems, cross-country trails, or point bars, having a carrier (1) and at least one sliding element (6) forming a sliding surface. The invention is characterized in that the sliding element (6) is connected to the carrier (1) in a detachable fashion by means of a fastening device (5) disposed on the carrier (1).
