Abstract (en)
[origin: EP1985554A1] The multicomponent packaging (1) has two components (3, 5) which have a first chamber (2) for accommodating the first component (3) of the adhesive. The first chamber has an opening for removal of the adhesive with a second chamber (4) arranged within the first chamber for accommodating the second component (5) of the adhesive and a seal which, in the stored state of the multicomponent packaging seals the opening (11, 15) in a fluid-tight manner. An independent claim is included for a method for the removal of a mixture.
