Abstract (en)  
[origin: US2010300157A1] An automatically controlled washing machine having a machine room in an upper part on a front side of the washing machine, wherein the washing machine includes a detergent dispensing unit, a drawer, and a portable storage container, all of which are arranged in the machine room. The drawer is accessible from the front side of the washing machine and has at least one compartment whose top is open for adding washing powder or washing liquid. A counter-latching device corresponds to an overridable latching device when the drawer is opened to fill the compartment with the washing powder or washing liquid. A receiving device receives a portable storage container behind the compartment of the drawer, wherein the storage container stores a liquid or gel-like washing aid. The washing machine also includes a dosage device to automatically dose the liquid and or gel-like washing aid.
