Abstract (en)

[origin: WO2008146280A2] In one aspect, the present invention is directed to a toilet-disinfectant dispensing system, the system comprising: a disinfectant substance dispenser installed such that the outlet thereof leads to the toilet bowl; and an activator for activating dispensing the substance before presence of waste inside the toilet bowl. According to one embodiment of the invention, the activator is a handle deployed underneath a seat of the toilet, thereby activating the dispensing upon sitting on the seat. In another aspect, the present invention is directed to a method for dispensing disinfectant into a toilet bowl, the method comprising the steps of: providing a dispenser for dispensing the disinfectant into the toilet bowl, wherein the dispenser comprises an activator; and upon activating the activator, dispensing the substance into the toilet bowl.
