Abstract (en)
[origin: DE202007007319U1] A door outer panel (1) and a door inner panel are engaged together at the longitudinal edges. Closures (2) are formed at the transverse edges of the door outer panel. Bent bars (8) at the transverse edges of the door inner panel engage into exterior opening grooves formed on the closures. A rib wedges into between each bar and each groove, when the groove is wider than the bar.
