Abstract (en)

[origin: WO2008134992A1] The invention relates to a terminal point (4) for connecting a ring terminal (6) to an electrical device, comprising an electrically conductive connecting piece (8) having a device connection (22) and a clamping device (12, 18) displaceable relative to the connecting piece (8) for pressing the ring terminal (6) against a contact surface (38) of the connecting piece (8), wherein at least one part (26a, b) of the connecting piece (8) is designed as a mounting device (28, 30, 47) captively holding the clamping device (12, 18) on the connecting piece (8).
