Abstract (en)  
[origin: EP2154320A2] The door holder (1) has a magnetizable or magnetic stop (3) fastened at a door (2). A magnetizable or magnetic locking bolt (7) is guidedly fastened at a base (4). The locking bolt is moved into a locking position when the stop enters a magnetic effective region by pivoting the door. A locking device (12) blocks the locking bolt against movement in the locking position. The locking bolt is guided in an anchorage element (8). The locking bolt is secured by a barrier (35) against unintentional release from the anchorage element.
