Abstract (en)

The piece (11) has a joint head (13) formed at an end and a joint socket (15) formed at another end. The joint head forms a pivot -joint with the joint socket. The joint socket is designed as a recess with a circular segment cross section. A connecting unit is designed as prismatic pin that is inserted in to a roller shutter profile of a roller shutter. The piece is made of plastic such as polyoxymethylene. A region of the profile cooperates with the connecting unit, where the profile is made of aluminum. An independent claim is also included for a roller shutter comprising roller shutter profiles.

Abstract (de)

ES wird ein Rollladen mit Rollladenprofilen (1) und Rollladenendstücken (11) vorgeschlagen, bei dem die Rollladenendstücke (11) eine gelenkige Verbindung (13, 15) aufweisen, so dass die daran befestigten Rollladenprofile (1) spielfrei miteinander verbunden sind.
