Abstract (en)
[origin: EP2154327A1] The gate of an improved type comprises a support frame (2) substantially "U"-shaped and having a horizontal crossbar (4) and two vertical uprights (8 and 11) and at least one closing door (3). The main characteristic of the present invention consists of the fact that, in use, the crossbar (4) is defined by two co-axial portions (5 and 6) connected by means of a first hinge (7) which allows said crossbar (4) to be folded up during its transport.
