Abstract (en)

[origin: EP2154457A2] The cooling device comprises a housing with a storage compartment (5,6,7), and a refrigerator for cooling the storage compartments. A control unit is provided for controlling the operation of the refrigerator corresponding to the target temperature and for the time-depending determination of the target temperature for a temperature process with a provided alteration rate. The starting target temperature is adjusted for the temperature process at the control unit.
