Abstract (en)
[origin: EP2154701A2] The device (1) has an insulating material housing (101) fixable at a wall. The housing exhibits an actuating body (10) at a front side (104). A covering hood is detachably coupled at the device. The hood covers the device for preventing unauthorized access to connection terminals. A coupling element (3) i.e. sealing cap, is detachably connected with the housing. The coupling element has a resting element for fixing the covering hood at the coupling element, and a punched hole for preventing unauthorized removing of the covering hood, which comprises of a ventilation slot.
