Abstract (en)

[origin: WO2008153458A1] The invention relates to an arrangement (30') for use with a medical device which arrangement comprises a shield (22') for a tip (23') of a needle member (14') of a medical device (1'). The arrangement (30') comprises a filter (21') for filtering gas to be transferred out from or into the medical device (1') via the needle member (14') when the arrangement (30') is interconnected with the medical device. The filter (21') is integrated with or constitutes at least a portion of the needle member tip shield (22').
