Abstract (en)

[origin: US2010175268A1] The device (1) according to the invention makes it possible to cut out material such as paper or cardboard. It comprises a body (2) which includes handling means, and means of fixing at least one blade (6), possibly retractable, one end of which extends projecting relative to a determined area of the surface of the body (2), in the position of use of the device (1). It is characterized in that the height of the blade (6) extending beyond the abovementioned area is between 10 microns and 104 microns, preferably 102 microns, and in that said area presents a relatively large surface area, of the order of 0.5 to 15 cm<sup>2</sup>.
