Abstract (en)

[origin: WO2008135550A2] The invention relates to a method for coating both sides of a molded piece made of rigid foamed material with a plastic film, characterized in that a) the molded piece is disposed and fixed in a capsule between films at a distance ratio, b) the air is evacuated from the capsule, and c) the films are thus pressed against opposite surfaces of the molded piece, while a vacuum is maintained between the films.
