Abstract (en)

[origin: WO2008146317A1] A single-dose vial (1) is described, comprising a containing body (3) having a first end equipped with a delivery opening (5) of a liquid contained inside such containing body (3) closed by a closing plug (11) and a second end opposite to such first end equipped with a filling opening (7), further comprising a plug/bearing base (9) for closing such filling opening (7), such plug/bearing base (9) having a lower external surface (17) adapted to form a bearing base of such single-dose vial (1). A process and a machinery are also described, for producing a single-dose vial (1).
