Abstract (en)

[origin: WO2008148726A2] The invention relates to a method for producing a fiber web, especially a graphic paper web, from a material composition that contains at least 20% by weight of the fiber material, selected from the group consisting of BCTMP, CTMP, APMP and any combinations thereof, and not more than 80% by weight of a wood-free material (kraft pulp). The moving fiber web is dried by means of at least one high-temperature drying device at a temperature of > 110°C, especially in the dry section of the relevant production machine in a section, in which it has a moisture content of at least 10%.
