Abstract (en)
[origin: WO2008125382A2] The invention relates to a turbocharger for a motor vehicle, comprising a compressor housing, a turbine housing and a bearing housing, and at least one flange on the compressor side. The invention is characterized in that the turbine housing is force-locked with the bearing housing by means of a fastening element that is arranged on the flange on the compressor side, thereby allowing the complete automatic assembly of the turbocharger.
