Abstract (en)

[origin: WO2009004183A2] The invention relates to a flexible piping (101) for conveying fluids, that comprises an inner undulated pipe (102) around which are provided a pressure resistance braid (109) having a tubular shape and made of an adapted material as well as an external mechanical protection (1 13) having a tubular shape. The flexible piping further includes an anti-abrasion sheath (1 17) provided around the external mechanical protection (1 13).
