Abstract (en)

[origin: WO2008149270A1] A method of managing items of clothing comprises the steps of providing an electronic archive particularly suitable for containing data relating to garments; providing one or more items of clothing, each item comprising a radiofrequency electronic identification element containing a plurality of data; acquiring the data contained in the identification elements by means of radiofrequency reading instruments; and storing the data and the number of items of clothing read within the electronic archive. The data relating to the garments comprising at least one datum from the following set of data: identification code, size, colour, supplier, type.
