Abstract (en)  
[origin: US2008301048A1] A method determines that a first relationship between a holder of a portable consumer device and a first employer is terminated. In response to determining that the first relationship is terminated, the method also disassociates account information of the portable consumer device from the first employer while retaining an association between the portable consumer device and an issuer of the portable consumer device. In addition, the method establishes a second relationship between the employee and a second employer and links the account information of the portable consumer device with the second employer.
