Abstract (en)  
[origin: EP2156773A1] The vacuum cleaner (1) has a cable (4) wound on a cable drum (5), and a power plug (3) connected to the cable. The power plug is movable from a stowing position into a gripping position by an auxiliary device. The device includes a positioning element movable along a defined movement path. Total length of the element is variable, where the total length of the element in the gripping position of the power plug exceeds the total length of the element in the stowing position of the power plug. The element is completely or partially designed as a tension or spiral spring or contains the spring.
