Abstract (en)  
[origin: EP2157247A1] The downpipe has an inflow channel (3) arranged at an upper inlet opening (2), and an outlet opening (5) arranged in an outer sidewall (4) of a housing (1). An accumulation wall (6) is arranged in the housing, in such a manner that a siphon channel (7) and a discharge channel (8) are formed within the housing. The channel (7) is attached to the channel (3), and the channel (8) flows into the opening (5). The channel (7) is limited by the sidewall and the wall (6), and the channel (8) is limited by the wall (6). The channel (8) is arranged between the channel (7) and the channel (3).
