Abstract (en)
The invention relates to a roof skylight window comprising a tilting window with a frame and a glass pane, whereby the tilting window can be tilted and is connected to a window casement frame and can be locked together with the window casement frame by means of a locking member to which an operating member is mounted near a ventilation opening in the frame, whereby the operating member comprises a second locking member that locks the operating member in a locked position with the frame so that the locking member is no longer operable.
