Abstract (en)

[origin: EP2157271A2] The semifinished door product (1) has a frame (2) extending about a significant circumference of the semifinished door product and a core (3) essentially enclosed by the frame. It has a structural stabilizing coating made of a composite material, especially a fiber-reinforced composite material that coats at least one side of the semifinished door product. An independent claim is also included for a door, especially a house door or a dwelling door with an inventive device.
