Abstract (en)
The plate (1) has a LED (4) mounted on a power supply circuit (3) connected to an electric wire (5). The LED and the circuit are mounted on a support plate (2) having a primary face (22) in which a groove (23) is formed. The groove defines a path of the circuit, and is designed for constituting housing for the circuit. The housing includes an orifice (25) for passage of light emitted by the LED through the support plate, where the groove is sealed with a resin and the circuit is formed from copper strip. A translucent plate (8) covers the support plate on lighting sides of the LED.

Abstract (fr)
La présente invention se rapporte à une plaque support (2) pour circuit d'au moins une diode (4) électroluminescente, caractérisée en ce qu'elle comporte au moins une face (22) dans laquelle a été réalisé au moins un sillon (23) définissant le chemin d'un circuit électrique (3) d'alimentation des diodes et conçu pour constituer un logement pour ledit circuit électrique, ainsi qu'à une plaque lumineuse (1) comportant une telle plaque support.
