Abstract (en)
[origin: EP2157592A1] The assembly has a switch body (2) comprising a bore (12) whose circumference is provided with a curved surface (15). A pivoting button (3) includes a finger pivotably cooperating with the bore and having a curved surface opposite the former curved surface. The button has a rib projecting from the latter curved surface and housed in a groove (17) of the switch body. The groove has a width greater than that of the rib, and is arranged in extension of the bore. The former surface has two sections arranged in a spaced manner from one another and on either side of the groove.
