Abstract (en)

[origin: WO2008139462A2] Apparatus and method for simultaneous turn-based play comprises: providing each one of a plurality of players with substantially identical play boards having a predetermined number of regularly arranged territories, providing each one of said plurality of players with an identical set of playing pieces, allowing all players simultaneous turns to place their playing pieces on said playing board, then, at the end of each simultaneous turn superimposing the play boards and providing a play result comprising eliminating certain playing pieces and leaving remaining pieces, then returning the boards to the players with the remaining pieces and repeating the simultaneous turns and said eliminating until only one player has any remaining pieces.
