Abstract (en)

[origin: WO2009007566A2] The invention relates to a half-module for an absorptive formwork element. It relates to a half-module which comprises a one-piece body (10) having a flat rectangular plate (12) and a frustoconical spacer (18) emerging through an opening, the body (10) comprising first (24, 25), second (30) and third (34, 36, 38, 40) additional connecting devices, the conicity of the spacer (18) and the thickness of the body (10) being such that two half-modules can nest together by forming an assembly whose thickness in the direction perpendicular to the flat surface of the plates (12) is less than 1.5 times the corresponding thickness of a half-module. Application to the construction of swimming pools.
