Abstract (en)
[origin: US2008318687A1] A three-dimensional rendering of a game space for a first instance of a game is displayed. The first instance of the game requests position information of avatars in game spaces of other instances of the game. Position information and a player identification for an avatar in another instance of the game is received. A position object is generated based on the position information and player identification, the position object being unable to interact with other objects in the first instance of the game. A graphical representation of the position object is displayed in the three-dimensional rendering of the game space of the first instance of the game, the graphical representation of the position object being positioned in the three-dimensional rendering of the game space based on the received position information.
