Abstract (en)  
The furniture has a cabinet body, at which an upper drawer (1) and a lower drawer slidable on each other. Illumination units (7) e.g. LED band, are arranged on a base section (2) of the upper drawer and are retained by a slot (9). Inner space of the lower drawer is illuminated using the illumination units. Sensors are provided for detecting open and close conditions of the cabinet body. A central controller is provided for switching the illumination units at the drawers. The base section is formed from transparent or translucent material.
