Abstract (en)

A method for the production of fixtures (2) made of wood or the like, wherein a plurality of components (4a, 4b) made of wood or the like are locked within corresponding clamping vices (29), are longitudinally profiled at respective free side faces (30a, 30b) protruding from the clamping vices (29) themselves, and are provided with coupling members (20) adapted to allow to connect the components (4a, 4b) themselves to one another; the clamping vices (29) thus being moved with respect to one another at least in a given direction (11) for connecting the components (4a, 4b) to one another and assembling a corresponding fixture (2).
