Abstract (en)

[origin: EP2159042A1] The packaging material reservoir (50) has a receiver for packaging material, which is attached to a drive section of a device in such a way that the packaging material is continuously supplied. A mounting opening is provided over which the packaging material is inserted in the receiver. A cover plate (17) is provided for locking the mounting opening. A rotating mechanism (37) is provided which allows a rotating movement of the cover plate around a stationary rotational axis (Q).
