Abstract (en)
[origin: EP2159493A2] The vapor extraction device (1) comprises an aerator (40) and a filter element surrounding partly the aerator. The filter element has a grease filter and the filter element downstreams the aerator. The filter element has an odor filter (30), which has a discharge opening of the vapor extraction device or upstreams a discharge opening of the vapor extraction device. The discharge opening surrounds the odor filter.
