Abstract (en)

[origin: WO2009000425A2] The invention relates to a system for identifying and verifying the integrity of a blister package (10) and for the installation or activation of software for helping to control whether a patient has taken his/her drugs. Said system comprises a blister package (10) having a blister base (12) with at least one receptacle (14), molded out of a base film and containing a tablet (16) or a similar drug portion, and a cover film (18), which is sealed towards the blister base (12) and can be forced through, an RFID tag (70 a) having an RFID chip (72 a) and an RFID antenna (74a) and arranged on the blister package (10), and an RFID reader associated with the patient.
