Abstract (en)  
[origin: US2009010866A1] The invention provides a hair care composition comprising: (i) emulsified particles of an alkyl modified silicone, and (ii) emulsified particles of a non-volatile, non-alkyl modified silicone. The compositions are particularly suitable for use as a conditioner for the treatment of hair (typically after shampooing) and subsequent rinsing. Compositions according to the invention deliver effective conditioning to the hair, without unacceptably high deposition.
