Abstract (en)
[origin: WO2009000737A2] The invention relates to a refrigeration device having a cooled interior space which is delimited by insulated walls (3) and an insulated door which closes off the interior space. The interior space has two cooled spaces (2, 20). According to the invention, a module (5) is arranged in the interior space of the refrigeration device, wherein the module walls (15, 6) of said module (5) delimit one of the cooled spaces (20). Furthermore, a cold generator (18) is integrated in the module (5).
