Abstract (en)

[origin: WO2009000718A2] The invention relates to a household refrigeration device having an inner container (1) which on the side walls (2, 3) thereof supports elongate contact supports (4) lying opposite each other, at the same height, on which an insertion part (6, 7) is supported. The invention is characterized in that one of the contact supports (4) has a recess (5) or a projection, at least locally, which works together in a form-fit with a locking element (16) of the insertion part (6, 7).
