Abstract (en)

[origin: EP2160960A2] The invention relates to a means for mounting an article, such as a sliding support (10) for a tray or drawer, on substantially horizontal elongate bars (20), such as those that are commonly found inside an oven, dishwasher, or other household appliance. The means for mounting includes a first retaining element (12) including a pair of notches (17) which prevents an end of a support (10) for the article from becoming detached from the bars (20). The system is easy to fit and safe for users.
