Abstract (en)
[origin: EP1366704A2] Dishwashing machine comprising a cabinet (2), wherein a wash tub (4) is housed closed by a door (3) on its front, also comprising: at least a first crockery holding basket (5) and a second crockery holding basket (6) housed in the wash tub (4), dispensing means (9) of washing agents associated to the wash tub (4) for supplying said washing agents into it, the door (3) comprising an inner door (7) depressed to the outside with respect to the wash tub (4) for maximizing the inner space of said wash tub (4) for housing the crockery to be washed, said dispensing means (9) being associated to said inner door (7). According to the invention, at least a first area (7A) and a second area (7B) are identified on said inner door (7), which are depressed in line with the dimensions of said first basket (5) and second basket (6), respectively when the door (3) is in its closed position; the dispensing means (9) are associated to the inner door (7) in line with a further area (7C) of said inner door differing from said at least first area (7A) and second area (7B).
