Abstract (en)

[origin: EP2161356A1] The spinning machine has multiple spinning stations and a pneumatic compression device, where a suction device (9) is assigned with a pressure indicating medium (10) for visual display of pressure or induced draft precipitating at the spinning station. The pressure indicating medium has a display element provided with a reset medium, where a force exerts a negative pressure on the display element. An independent claim is included for a suction device for a pneumatic compression device of a spinning machine.
