Abstract (en)

[origin: EP2161385A1] The component has a screw connection plate (13) with a front side (17) screws are screwed for fastening the component that is made of plastic. The connection plate is arranged at an end of a hollow, cylindrical fastening body (15). The fastening body has a reinforcement structure (35) for absorbing lateral force. The reinforcement structure is designed as an insertion part or attachment part, where the insertion part consists of reinforcement walls (21) that are supported at a circumference wall of the fastening body.
