Abstract (en)
[origin: EP2161387A2] The element has a rectangular wall body (1) designed in such a manner that wall thickness (D) of the body does not exceed 40 millimeter. A connecting profile (5) is connected to a connection profile (4) i.e. hollow profile, by connecting screws (30). The profile (4) includes T-shaped profile sections (12), which project from a base (6). A leg (13) internally limits a groove (15) in a direction of a middle plane (M) by the sections. The leg is connected to the base at an end and runs parallel to the plane. Another leg (14) protrudes inwardly in the direction of the plane from the leg (13).
