Abstract (en)

[origin: EP2161388A2] The safety device (6) has a shank (6.1), having an angular profile, where the angular profile has a c-shaped central profile area (6.0) for encompassing a covering element. A mounting shank is connected to the covering element for connection with a roof support, and the shank is connected with a protection element (10) for covering element, which is overlapping with the former covering element.
