Abstract (en)
The booth (10) has an air conditioning system (16) with a controlled and/or guided ventilation system for producing low pressure in the booth that is designed as a separate unit for installation in inner and outer areas. The booth is supplied with fresh air from an outer area of an installation location through the air conditioning system. Exhaust air of the booth is guided over the air conditioning system into the outer areas of the installation location for ventilation of the booth. The air conditioning system directly delivers the exhaust air to an environment.

Abstract (de)
Die Erfindung betrifft eine Raucherkabine, welche es ermöglicht auch im Innenraum von Gebäuden Räume zur Verfügung zu stellen, welche dem Nichtrauchererschutz genügt.
