Abstract (en)

[origin: EP2161400A2] The retrofit kit has a carrier unit (1) extending in direction of motion of a wing, where components (24,26) of a drive are arranged to process a wing in an automatic manner. The components are placed at holders in an assembled condition in stationary manner, so that each holder forms a fixing module with or at the mounting components. An independent claim is included for an automatic sliding door.
