Abstract (en)  
[origin: EP2161496A1] The lighting unit has a lamp (1) and a plate-shaped transparent construction element. A free space (5) is formed in the row of the construction element by the edge surface of the construction element. The lamp is arranged in the free space and is aligned to the edge surface of the construction element. The free space is formed by a chamfer surface (3a) provided in the edge surface of the construction element. The chamfer surface is enclosed along its longitudinal extension partially by a profile element, particularly a metal profile such as stainless steel profile.
